

- 1.) Open a Power BI report with sales data and apply a Visual Level Filter to a bar chart so that it only displays products with sales greater than 500 units.

ANSWERS:

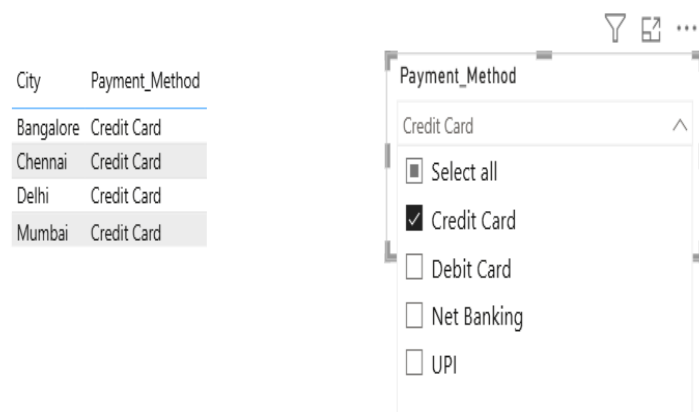

- 2.) Add a Page Level Filter to your dashboard that allows users to view only transactions from the city 'Ahmedabad' across all visuals on the current page.

ANSWERS:

City	Payment_Method	Sum of Amount_INR
Ahmedabad	Net Banking	8159
Ahmedabad	UPI	4110
Total		12269

- 3.) Insert a Slicer for 'Payment Method' (e.g., UPI, Card, Cash) and sync this slicer across two pages in your Power BI report so that the selected payment method filters both pages.

ANSWERS:

4.) Create a navigation button using Bookmarks and Buttons in Power BI that lets users jump from the 'Overview' page to a 'Top Customers' page and back, updating the view accordingly.

Hint: Use the 'Add Bookmark' and 'Action' features to set up the navigation.

ANSWERS:

5.) Set up a Report Level Filter to show only data from the year 2023 throughout your entire Power BI report, regardless of the page or visual.

ANSWERS:
