

- 1) Download and install Power BI Desktop on your computer, then open the application and take a screenshot of the blank report interface

ANSWER:

- 2) Explore the Power BI Desktop interface and identify the following components: Report View, Data View, Model View, Fields Pane, Visualizations Pane, and Filters Pane. Write a short description (1-2 lines) for each component.

ANSWER:

Report View → Create reports.

Data View → View data tables.

Model View → Manage table relationships.

Fields Pane → Contains data fields.

Visualizations Pane → Create charts and visuals.

Filters Pane → Filter data displayed in reports.

3) Create a new blank report in Power BI Desktop and add a table visual using the Visualizations Pane. Rename the report page to 'My First Dashboard'

ANSWERS:

Select or drag fields to populate this visual

4. List 3 key differences between Excel Dashboards and Power BI Dashboards, focusing on features or workflows you noticed while exploring Power BI Desktop.

ANSWERS:

Data Size

- Excel: Small to medium data.
- Power BI: Large datasets.

Visuals

- Excel: Basic charts.
- Power BI: Interactive charts and dashboards.

Sharing

- Excel: Share files manually.
- Power BI: Online sharing with automatic refresh.
